

Statement on the topic of REACH (EU Regulation (EC) No. 1907/2006) and ChemG

Responsibility

OTT-JAKOB Spanntechnik GmbH is aware of its responsibility and obligations under EU Regulation (EC) No. 1907/2006, known as REACH (Registration, Evaluation, Authorization, and Restriction of Chemicals). This regulation aims to improve the protection of human health and the environment from risks that can arise from chemicals by reducing the use of substances of very high concern (SVHC).

Role

As a manufacturer and importer of products, we at OTT-JAKOB ensure that our products are manufactured in compliance with REACH regulations. Relevant to us is the duty to inform customers in accordance with REACH Article 33 and the notification to the European Chemicals Agency (ECHA) in accordance with §16f ChemG.

Duty to Inform

We fulfill our duty to inform customers through an appropriate notice in the order confirmation.

SCIP Notification

Some of our products contain purchased parts with an SVHC content above 0.1%. We report these products to the ECHA SCIP database.

Endeavor

Our endeavor is to reduce the proportion of SVHC substances in our products as much as possible. An internal communication process ensures that we are always up to date with all SVHC notifications from our suppliers. Furthermore, we regularly inquire about the current status regarding SVHC in our purchased parts and, if necessary, request SVHC-free alternatives. Internally produced parts are consistently manufactured without SVHC.

For specific inquiries or further information about our handling of REACH, please contact:
